

## Appendix 4—Publications and products

The GRDC has a large number of publications and information products, in print, tape and electronic formats. Many hard copy products are provided free of charge (stocks of some free publications are limited), while others are sold to fully or partially recover the costs of publication. There are some publications which are available only in electronic format and can be found on the GRDC's website at [www.grdc.com.au](http://www.grdc.com.au).

The GRDC's website also provides a catalogue of GRDC publications and an online bookshop. On average, the GRDC's home page received between 21,000 and 32,000 page views per month in 2007–08. The bookshop received approximately 2,600 page views per month.

Most of the GRDC's 2007–08 reports and publications are publicly available. Key publications released in 2007–08 are listed below.

### Publications available to the public free of charge
